this newsletter presents up to date regular topics and ad hoc items.

PROJECTS' update

Welcome Audrey and Eloïse!

The ILEAnet team is pleased to welcome Audrey Rochard (Project Manager) and Eloïse Chassaing (Project Manager & Scientific Coordination).

Audrey will first be in charge of the subcontracting portion and Eloïse will be in support of the different workpackage leaders and scientific coordination.

Audrey and Eloïse will be located at the ENSP research center in Saint Cyr Au Mont d'Or (Lyon, France).

RAMSES

On July the 8th, the RAMSES project hold its second webinar in collaboration with Interpol.

RAMSES' overall objective is to design and develop a holistic, intelligent, scalable and modular platform for Law Enforcement Agencies to facilitate digital Forensic Investigations. The system will extract, analyse, link and interpret information extracted from Internet related with financially-motivated malware. Customers, developers and malware victims will be included in order to obtain a better understanding of how and where

malware spreads and get the source of the threat (more info on: <https://ramses2020.eu/>).

The webinar aimed at preparing the ILEAnet IPUP (ILEAnet Project Uptake Process) by LEAs and more precisely the Industrialization phase of the project. Attended by 22 participants from 10 countries, the webinar was a great success!

Audrey Rochard is taking over the three subcontracting processes funded by the EU Commission through ILEAnet. All subcontracting activities are based on the challenges and needs identified by the network's LEAs. The first subcontracting aims at generating an analysis of the existing and emerging trends in information sharing mechanisms between European law enforcement, in order to develop recommendations for future RDI policies. The second subcontracting is focused on finding a scientific method able to assess age, especially in the migration area, that is reliable enough and respectful of legal requirements, so that it can be developed by law enforcement in Europe at a decent cost. A margin of funds is kept for a third subcontracting, designed to tackle the issues underlined by the network at the next Public Workshop. The next steps include finishing the drafts of the subcontracting activities and publishing them to launch the procedure.

ILEAnet IPUP (ILEAnet Project Uptake Process)

ILEAnet is working on rolling out the ILEAnet Project Uptake Process, which is a whole methodology designed by ILEAnet to facilitate the project uptake and industrialisation by LEA practitioners. Eloise Chassaing will be in charge of implicating the participants to carry out this industrialization phase. Don't hesitate to contact her if you are interested: eloise.chassaing@interieur.gouv.fr

PARTNER'S FOCUS

United Kingdom

INC: Graham KISSOCK

The UK has been in lockdown from the 24th March and it has proven to be a very challenging time for the PSNI. New Health Legislation aiming at slowing and stopping the spread of the virus has had to be rapidly understood and operationally implemented and it meant the introduction of new ways of operating in a 'COVID' safe way. For officers and staff interacting with members of the public this has been difficult. To help keeping police personnel and the public safe, finding and buying personal protective equipment (gloves, masks...) has been challenging. Keeping detention centers (custody suites) open and functional has taken significant redesign of ways of working and dealing with detained individuals. The anticipated absence rates of officers and staff did not happen. But the challenges of social distancing, shielding and minimizing the risk of virus spread within the workplace has had a significant impact. With Northern Ireland and the UK continuing to see infection rates fall, primarily through the vast majority of citizens complying with the health advice and regulations, the society looks forward to a new safer normality.

So what impact did the lockdown have on crime? The PSNI saw an initial significant drop in overall crime reports but this may be slowly returning towards pre-pandemic levels. The PSNI hopes to see a reduction in virus infection rates and that crime levels may stay suppressed, in order to keep people safe during these exceptional times.

The PSNI is involved in over 15 EU Horizon 2020 funded projects. The PSNI declared a 'force majeure' in project terms, once the UK lockdown was declared. Staff have been redeployed away from the EU project work to roles and responsibilities critical to law enforcement priorities.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 740714.

ANIMATIONS

Public Workshop

The 3rd ILEAnet Public Workshop (PW3) will take place online on 3-5 November 2020 and will focus on Technology and Migration, with the twofold objective of providing a forum for end-users and learning more and appropriating about projects that are developing technologies to address some of the challenges faced by law enforcement agencies working in the field of Migration and Border Control. We will get back to you as soon as possible with the agenda and registration details.

In the meantime, if you have colleagues working in the field who might be interested in participating in the event, or if you know of any projects that might be suitable as case studies, then please send us the details to ileanet-sc@eurtd.com.

MAGNETO Webinar

The next webinar organized by ILEAnet will be dedicated to the Magneto project. The technologies and solutions developed by MAGNETO will permit LEAs to consistently process massive heterogeneous data in a more efficient manner, effectively enabling their transformation into solid and court-proof evidence.

ILEAnet is working on rolling out the ILEAnet Project Uptake Process, which is a whole methodology designed by ILEAnet to facilitate the project uptake and industrialisation by LEA practitioners. We'll be back shortly to let you know when and how to register!

CALENDAR & EVENTS

- **3.09.2020** INC Meeting ILEAnet
- **14-17.09.2020** Community of Users on Secure, Safe and Resilient Societies DRS Workshop
- **3-5.11.2020** ILEAnet Public Workshop #3 (e-event)
- **14-17.12.2020** DRS Events

THE ILENET TEAM
WISHES YOU ALL

HAPPY HOLIDAYS!
