SAVE THE DATE – ILEAnet Public Workshop 3 -

3rd, 4th & 5th November

ILEAnet Public Workshop

INNOVATIVE TECHNOLOGIES FOR BORDER MANAGEMENT

3-4 and 5 November 2020
Virtual event

With the support and participation of
FRONTEX

Registration: ensp-ileanet@interieur.gouv.fr

The ILEAnet project is pleased to announce the launch of registrations for the 3rd Public Workshop dedicated to: **Innovative Technologies for border management.**

Tackling operational challenges and needs related to the management of irregular migration, this event will be held with the support and participation of the **European Border and Coast Guard Agency (Frontex).**

The topics addressed in this third ILEAnet Public Workshop are based on the operational challenges and needs identified by ILEAnet and will benefit from the perspective provided by Frontex.

They include the registration of irregular migrants, the monitoring of pre-frontier areas and the exploitation of information systems related to these issues. More specifically, attention will be paid to practical needs raised by LEAs in response to ILEAnet surveys.

They range from the training needs of field officers in domains such as interview techniques, foreign languages, legal frameworks, risk analysis and data collection to the compatibility and management of the different public databases, the improvement of the criminal intelligence processes and border information collection system, the possibility to conduct mass data analysis and the access to all relevant data including from biometric documents.

Showcasing research projects & promoting useful outputs

In line with the ILEAnet methodology as evidenced in previous events, the third ILEAnet Public Workshop will convene an expert audience. It will also benefit from the support and participation from Frontex and provide latest developments and thinking in the management of irregular migration. Focusing on tangible outputs to encourage uptake, it will also target and showcase innovative solutions adopting a use case/scenario approach as to ensure that LEAs gain valuable insights into the relevance and easiness of use of those solutions prior to considering deploying them.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 740714.

Project Coordinator
Thierry Hartmann, French Ministry of Interior
thierry.hartmann@interieur.gouv.fr

At the end of this three-day event, participants will have:

- Furthered their awareness of the challenges and needs faced by LEAs dealing with illegal migration
- Gained an informed overview of best practices and solutions existing in this domain
- Reflected on potential gaps and opportunities in order to inform a future research agenda supportive of LEAs' priorities
- Learned about solutions brought by security research and innovation in a practical way
- Deepened their own expertise benefitting from peers' testimonials and experiences and migratory outlook from Frontex

Registrations are now open for LEAs and academics dealing with border management-related issues in their line of work.

If interested, please contact the ILEAnet Scientific Coordination at: ensp-ileanet@interieur.gouv.fr

ILEAnet SUCONTRACTING

CALL FOR TENDERS!

IN-DEPTH STUDY ON INFORMATION SHARING MECHANISMS BETWEEN LAW ENFORCEMENT IN EUROPE (MIGRATION, CYBERCRIME, TERRORISM AND ORGANIZED CRIME).

<https://www.marches-publics.gouv.fr/?page=entreprise.AccueilEntreprise> (CODE ENSP-CDR-MP0120)

DEADLINE TO SUBMIT OFFERS IS OCTOBER 27TH 2020

We are pleased to inform you that ILEAnet, through the French National Police Academy (ENSP), is launching a public tender to find a contractor able to provide an in-depth study on information sharing mechanisms between LEAs in Europe, in four areas identified as crucial (Migration, Cybercrime, Terrorism and Organized Crime).

It should involve a mapping of the existing and emerging trends and mechanisms used for information sharing, an assessment and analysis

focusing on good practices and challenges, as well as recommendations and solutions for concrete improvements.

If you are interested, find more information here:

- On the French Public Procurement Platform, entering the tender's profile "ENSP-CDR-MP0120" <https://www.marches-publics.gouv.fr/?page=entreprise.AccueilEntreprise>
- On the European Public Procurement Platform, entering the tender's profile 'ENSP-CDR-MP0120' <https://ted.europa.eu/udl?uri=TED:NOTICE:420536-2020:TEXT:FR:HTML>

Please note that the original deadline to submit offers is **October 27th**.

Do not hesitate to share this with your scientific network!

ILEAnet
Innovation by Law Enforcement Agencies Network

PROJECT UPTAKE PROCESS (IPUP)

BEYOND YOUR PROJECT, THINK OPERATIONAL EXPLOITATION!

Once a solution is identified for a specific Law Enforcement need, ILEAnet launches the ILEAnet Project Uptake Process - IPUP. But what is it for?

The IPUP is designed to **promote engagement** between LEAs and research projects to further support the **operational exploitation** of the project outcomes. It also aims at easing the discussion around operational exploitation between LEAs and solution providers with proposals meeting LEAs' needs.

The IPUP is a 8-step process:

- Project ID CARD**
The project ID card summarizes the project objectives, scope and outcomes.
- TELOS**
TELOS is a questionnaire assessing the maturity level of the project outputs, their compliance with legal, ethical and societal requirements and their economic and operational impacts.
- SCENARIO**
It illustrates in a practical way how solutions can be deployed by LEAs in their activities.
- PROJECT SELECTION**
The project selection by ILEAnet team assesses the matching between LEAs needs and the project outputs.
- TECHNICAL PRESENTATION & DEMONSTRATION**
The technical presentation of the project outputs shows the solutions in action & presents their functionalities.
- TEST**
LEAs interested in the project outputs test the solution to assess their interest & identify their requirements for an operational exploitation.
- SUMMARY OF REQUIREMENTS**
It collects all previously returned requirements from LEAs interested in the outputs and will be the basis for further operational exploitation work.
- EXPERT MEETING**
It defines the best operational exploitation approach (new EU project, identification of possible funds etc.).

ILEANET PROJECT
<https://www.ileanet.eu>
Twitter LinkedIn

After 3 years of project and activities, ILEAnet took the time to **refine its strategy**. The team worked on **setting a clear guidance for the next 2 years**.

The team took care of **sharing its vision** with the Steering Committee and the community of INCs as it is essential to all move forward in the same direction. This will be presented to the European Commission within the end of the year.

What are ILEAnet's main objectives?

The project, taking advantage of a strong and determined team, would like to **demonstrate the operability of ILEAnet**, by covering the whole scope of the project's tasks, organizing ILEAnet's activities in a global coherence, and preparing a smooth hand-over.

What will be concretely done during the remaining months?

ILEAnet initiated a **range of exercises that will be more broadly deployed, improved, tested** in the coming months, including but not limited to:

- Theme-specific public workshops
- The IPUP - ILEAnet Project Uptake Process
- Subcontracting activities
- Standardization activities
- The Knowledge Factory
- Network-specific activities

<https://ileanet.eurtd.com/file/view/248742/ipup-process>

These are examples of **concrete actions** designed to improve Law Enforcement practitioners' involvement in research projects by fostering their participation during and after the projects and by promoting sharing of goods practices. Those events aim at strengthening the relationships between LEAs and **academics** on security research as well.

At the network level, a brainstorm work is undertaken to think about practical ways to increase practitioners' involvement in research, development and innovation, and for that, ILEAnet has started a global collection of all possible recommendations in that sense.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 740714.

QUESTIONS OF THE MONTH

A question, an information to communicate to ILEAnet members? Do not hesitate to post a message on the platform

Request for information concerning pepper-ball type of munitions OC, PAVA and alike

The Colombian police context is unfortunately similar to the French police context (distrust, allegations of unjustified use of force by police officers) and in this respect, the Colombian authorities questioned the quality of the initial training of its front-line officers.

We would like (Interpol and the The French Police Academy) to know whether ILEAnet can provide feedback in this area.(study on the correlation training/population confidence rate/use of force incident rates, NGO reports etc.) or pedagogical contacts responsible for establishing or monitoring or reforming the curricula of recruitment and training cycles for frontline police officers. Thank you in advance for your answers
